

SYN-T2D-004: Synthetic Type 2 Diabetes Study

(table layout)

Synthetic document for software testing only. No real patient data.

1. Study Overview

Adults with type 2 diabetes receiving a hypothetical oral therapy.

2. Key Inclusion Criteria

ID	Criterion	Notes
I-01	Age 30–70 years inclusive	Age within range on the assessment date
I-02	Documented diagnosis of type 2 diabetes	Diagnosis recorded in the patient record
I-03	HbA1c 7.5%–10.5% inclusive, measured within 90 days before assessment	Dated result required
I-04	eGFR at least 45 mL/min/1.73m2	Dated result required
I-05	Potassium 3.5–5.0 mmol/L inclusive, measured within 30 days	Dated result required

3. Key Exclusion Criteria

ID	Criterion	Notes
E-01	Known type 1 diabetes diagnosis	Exclude if documented
E-02	Pregnancy or breastfeeding	Exclude if documented
E-03	Recent acute medical instability requiring urgent treatment	Refer for clinician review
E-04	Missing or stale required laboratory result	Report as insufficient information

4. Data Requirements for Screening

Lab values need units and observation dates. Missing values are reported as missing.

5. Screening Outcomes

Eligible, not eligible, or more information required.
