

SYN-RENAL-001: A Synthetic Phase II Study of Investigational

Product XR-17

Protocol version 1.0 (synthetic document for software testing only).

Synopsis

This synthetic protocol describes a randomized, double-blind study of the investigational product XR-17 in adults with type 2 diabetes mellitus.

XR-17 is cleared by the kidneys, so participant renal function is assessed at screening. No real patient data is contained in this document.

Primary objective: change in HbA1c from baseline to week 24.

Inclusion Criteria

Participants must meet all of the following criteria:

1. Age 18 to 70 years inclusive.
2. Estimated glomerular filtration rate (eGFR) must not be below 30 mL/min/1.73m².

Exclusion Criteria

Participants meeting any of the following are excluded:

1. Severe renal impairment.
2. Pregnancy or breastfeeding.
